About the Journal	ii
Editor in Chief	ii
Publisher	ii
Aims & Scope	iii
1. Modeling and Simulation of a Doubly Fed Induction Generator Based Wind Turbine <i>Khalid Waleed Nasser</i>	<u>69-76</u>
2. Optimal Power Flow by using Distributed Generation in Six Buses Iraqi Network <i>Husham Sulaiman Sajir</i>	<u>77-81</u>
3. Techno-Economic Analysis of Grid-Connected PV Systems Using BAT Algorithms and Comparison with other Algorithms <i>Abdurazaq Elbaz</i>	<u>82-88</u>
4. Performance Analysis Rectangular Patch Antenna 3.5 GHz for Wi-Max and WLAN <i>Ali Abozied, Abdelaziz Al-dawi, Cihat Seker</i>	<u>89-93</u>
5. Simulation of Rectangular Microstrip Antennas and the Effect of Variable Frequencies and Performance Analysis <i>Ali Abozied</i>	<u>94-97</u>
